This is a page from the second part of CAUTIL03. It displays information sorted by Teacher name and course section.

The number before the slash is the average number of students enrolled in each Teacher course section daily during the attendance period, using the rounding.

The number after the slash is average number of students for all attendance periods to date, using the rounding convention specified on the parameter screen. For example, the number after the slash for Period 2 averages the students in Period 1 and 2 and for Period 3 it averages the students in Periods 1, 2 and 3.

The average on the right (Average column) is the average enrollment without rounding for all attendance periods. Numbers in Average column calculate based on report parameters "Calculate by Rounded Average (old)" and "Calculate: (D)ay; (P)eriod", value will be unrounded number: a) rounded average number of students enrolled in each course section daily during the attendance period, using the rounding convention specified on the parameter screen, for each period divided by number of periods; b) total of average number of students enrolled in each course section daily during the attendance period for each period divided by number of periods; c) total of daily enrolled students in each course section daily during the report range divided by number of instructional days in the report range.

The Average column Teacher totals are added together section numbers from
